The UK workforce is 47% female and 53% male

Medical practitioners diagnose mental and physical injuries, disorders and diseases, prescribe and give treatment, recommend preventative action, and conduct medical education and research activities. They may specialise in particular areas of modern medicine or work in general practice and, where necessary, refer the patient to a specialist.

General Practitioner

Future employment

Examines patient, arranges for any necessary x-rays or other tests and interprets results; Diagnoses condition and prescribes and/or administers appropriate treatment/surgery; Administers medical tests and inoculations against communicable diseases; Supervises patient's progress and advises on diet, exercise and other preventative action; Refers patient to specialist where necessary and liaises with specialist; Prepares and delivers lectures, undertakes research, and conducts and participates in clinical trials; Supervises the implementation of care and treatment plans by other healthcare providers.
